Age: 23 years old | Nationality: Mexican

WORK EXPERIENCE

March 2022 until now

Junior Web Developer
Jonima Development, CDMX

Bring support and solve problems related to large database insertion based systems. My role is to solve problems and bring solutions to clients needs. Also, I have to be in touch with key users in order to ensure the proper working of the systems.

EDUCATION AND TRAINING

2017 - 2022

Computer Systems Engineering
Escuela Superior de Cómputo, Instituto Politécnico Nacional, CDMX, Mexico.

I have worked on school projects, using different technologies, including: Javascript, NodeJS, MongoDB, Bootstrap for a subject called Distributed Systems, in order to simulate a Distributed System, which you can take a look on my personal Github.
My final Project consisted in an autonomous drone, which was developed using a Raspberry Pi and Embedded Programming (Python
and C++).
I have also implemented cryptography algorithms (AES, RSA, SHA)

PERSONAL SKILLS AND COMPETENCES

Mother tongue

Spanish

Other languages

	COMPREHENSION		SPEAKING		WRITING
	Listening	Reading	Oral interaction	Oral expression	
Ingles	60	55	-	-	57
	573 points at TOEFL ITP (B2 equivalence)				

Social Skills

- In my currently environment I have managed to communicate with the entire team and deliver results in order to achieve goals.
- Really efficient as a team worker and easy to communicate person, due to the experience dealing with clients, who were non-tech related people.

Techonological skills

- I have used multiple programming languages and development tools, such as: Python, Java, C, C++, SQL, MongoDB, Javascript, HTML, CSS, Bootstrap, Raspberry Pi, Linux
- Capable of using Microsoft Office and other free software choices, such as LibreOffice anf OpenOffice as a result of been intern in a goverment office
- Basic understanding of Adobe Premiere Pro (video editing software)
